This design was created from Design systems suitable for animals, similar to the happy forest Our design is distinguished by the red color, as it is a popular color for animals, making them feel safe and comfortable And we added a mixture of other colours to it, and we added natural trees to it to give the place a suitable environment for animals We provided her with the hotel department with its special toys and safety that the animal feels Cages, animals do not feel monopolised The VIP section is a different world of unique and rare animals And our priority was not only the animal, as we provided the waiting area with a different design, so that the owner of the animal feels that he is in an environment suitable for his animal This design is created with different features for each pet
